

Ideal for homes and offices, the newly improved King Cobra MkII gives you certified protection against burglary and fire for valuable items, cash and documents.

King Cobra MkII

BURGLARY- & FIRE-RESISTANT PROTECTION

New-and-improved design

The King Cobra MkII range has been further improved to enhance protection against burglary and fire. Each of the following features has been remodeled and refined for optimal performance:

- **Body and Barrier**

Benefit from a robust and durable body that boasts an overall 65mm barrier thickness made up of a high-density monolithic casting contained within inner and outer steel casing. This presents a formidable barrier against outside attacks to the safe.

- **Door and Boltwork**

The door and bolts are designed to provide access to you, but work together to secure the contents of the safe in case of attack. A solid composite 35mm thick door is combined with additional protection plates to protect crucial locking areas. Solid steel moving bolts with a 28.5mm diameter affix the door to the body, while fixed "anti-heeling" bolts on both front and rear edges protect the door from prying attack along with relocking device to ensure bolts remain firmly in place should an attack on the lock occur.

- **Burglary Resistance**

To prove its protection level, the King Cobra MkII has been tested in accordance with EN 14450 Level S2, certified by ECB•S, the most widely recognized certification body in Europe. The ECB•S certification label is affixed to the inside of the safe door.

- **Fire Resistance**

The new door built from specialized materials ensures unrivalled protection against fire in its class. King Cobra MkII is tested in accordance with the Japanese Industrial Standard JIS S1037. In the event of a fire, your documents are protected for up to 60 minutes.

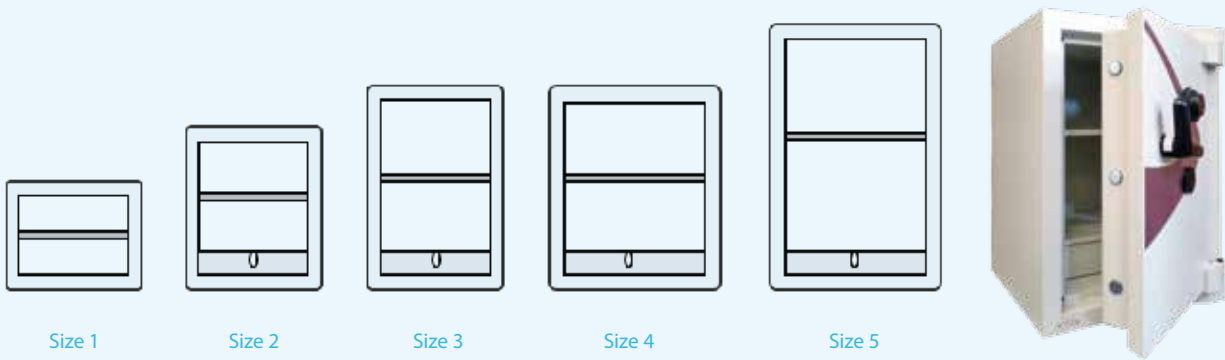

- **Base fixing**

Enjoy increased resistance and protection against unauthorized removal thanks to the anchoring holes. Two security fixing bolts ensure that the safe can be firmly fixed to the floor when installed correctly.
